# TELLS OF JUGGLING IN BANK

EX-SECRETARY OF JENKINS TRUST CO. DESCRIBES LOANS.

Money Paid Out to Employees of Broker age Firm of J. G. Jenkins, Jr., Who Is on Trial -Loans Bearranged When Inquiry Was Impending, He Says.

When the trial of John G. Jenkins, Jr., the jury for which was selected on Monday, began yesterday before Justice Kelly and a jury in the Supreme Court, Brooklyn, District Attorney Clarke in his opening address severely criticised the defendant for his alleged irregularities as president of the Jenkins Trust Company. The defendant was indicted last May for the embezzlement of \$50,000 the company. In outlining the case Mr. Clarke said that Jenkins had stolen that amount and much more for the purpose of bolstering up the Frank & J. G. Jenkins Company, a family enterprise with offices at 72 Broadway,

Mr. Clarke said that Jenkins had elaborated a system of fictitious loans to dummies whereby he got money for his brokerage business, and that he covered up these loans by means of false entries; that he took the money when the bank was struggling for existence and in spite of a law which says that no bank or stock company can legally lend more than 10 per cent. of its capital and surplus to any director nor more than 40 per cent. to any one, and the 40 only with the consent of the board of directors, who must require collateral security 15 per cent. in excess of the loan. He said that the defendant without the consent or knowledge of the directors had taken \$557,000 when the capital and surplus amounted only to \$750,000.

When the bank closed because of the

money stringency it was found that loans aggregating \$472,000 had been made to clerks in the employ of the Jenkins brokerage firm. Mr. Clarke contends that this money was never handled by these clerks, but that it was used in stock speculations said, that had been covered up by for-geries, false entries and more forgeries. In his opinion the clerks had done wrong, but had done it as a soldier does his duty All this is supposed to have been done without the knowledge of the directors, and Mr. Clarke undertook to show how. He said that credit slips were made out from time to time and carried as cash; that small payments were made on the loans and that these loans were turned in theoretically and redistributed among other dummies in order to make it appear

other dummies in order to make it appear that the money was working legitimately, although but little money was actually paid in, the whole consisting of a juggling of paper. This, he said, was done when an investigation became inevitable and it became necessary to make it appear to the committee of three directors having the matter in charge that the loans were legitimately distributed among several persons.

In conclusion Mr. Clarke said: "This man, after frauds and forgeries and false entries, took the money which was the very life blood of the trust company, and very life blood of the trust contact money in fraud of the directors used that money for himself and his relatives, to the sacri-

ce of the trust company."
Stephen C. Baldwin, counsel for the de objected to nearly everything that

fense, objected to nearly everything that Mr. Clarke had charged, saying that as the trial progressed it would be seen that it was insusceptible of proof.

Samuel Marks, an employee in the County Clerk's office, was called and swore to the authenticity of the articles of incorporation of the Jenkins Trust Company. and of the brokerage concern. He wa followed by William A. Conklin, formerly secretary of the trust company and now star witness for the prospection. He lives at 44 Greenwood avenue, Richmond Hill, became secretary of the Jenkins Trust Company after the merger with the Coney Island and Bath Beach Bank, in which he was employed, and continued in which he was emple red, and continued

as secretary until the fall of 1907.

Mr. Conklin said that he had given credit to the brokerage firm for a loan of oredit to the brokerage firm for a loan of \$50,000—the same on which the indictment was found; that he had done so under the direction of John G. Jenkins, Jr., then president of the bank, and he identified the loan book and the item. The order on which the money was obtained was on one of the blank checks used by the Jenkins brokerage firm and read. "Jenkins Trust Company—Pay to the order of Charles H. Reuter, cashier, for ourselves, the sum of \$50,000. (Signed) Frank and ne sum of \$50,000. (Signed) Frank and G. Jenkins, Jr " It was identified and

J. G. Jenkins, Jr. It was identified and offered in evidence.

The part played in the game by Reuter, J. L. Hart, Waldo Hunter and Fred Kaiser was explained by Conklin, who said that all of these were employed in the brokerage firm and that large sums were loaned to them nominally, but that they really were credited to Frank and J. G. Jenkins, Jr. Stocks of the brokerage concern were put up as collateral security for the loans made to the employees of that conloans made to the employees of that con-cern. At one time, according to the witness, Waldo E. Hunter owed the bank

witness, Waldo E. Hunter owed the bank \$188,000, and on the same page on which that item was entered was another crediting the brokerage firm for which he worked with the same amount.

Conklin testified that on August 19, 1907, the defendant told him to credit demand loans with \$150,000 and to give the slip to the teller with instructions to carry it as eash; this, although no such amount was paid on demand loans, accordamount was paid on demand loans, according to his knowledge. In September the defendant rearranged the loans, dividing them into six portions. Conklin said that he did so because of an impending

Corporation Counsel Pendleton advises the Aldermen that they can refuse to license theatre ticket speculators but that there is doubt of their power to fix the price at which tickets shall be sold. So if they want to try to do that also he advises that they pass two ordinances.

The indictment was based on this loan and Mr. Baldwin promises to show that Conklin's story of the transaction can't possibly be correct, as he was absent from the bank on the day when the loan is said to have been made. He questioned Conklin closely as to the circumstances leading up to the loans and drew from him in the summer time and that in that season in the summer time and that in that season the first company often requested the the trust company often requested the brokerage concern to handle its surplus. ### FEARS ANOTHER CIVIL WAR THE REV. PERCY GRANT SAYS UNREST MAY BRING IT.

Counsels Conciliation Between Employ-

ers and Employees and Special Consideration for Growth of Idealistic Socialism-The Troubles of France. The Rev. Percy Grant, rector of the Church of the Ascension on Fifth avenue,

who brought his after service meetings for the Christian Socialist Fellowship into some prominence last winter, told the New York members and guests of the Printers League of America, dining at the Hotel Westminster last night, that all should unite in an effort to prevent civil war arising out of a clash between classes in this country. The Rev. Mr. Grant said this in speaking of the experience he had had during the last year with his weekly meeings, wherein workingmen and em ployers met on common footing.

"When you deal with laboring men you are bound to find a great many Socialists among them," said he. "The leaders of labor will tell you that while only about only 10 per cent. of the membership in labor unions is composed of Socialists that small proportion makes more trouble-perhaps I should say, causes more excitement than all of the rest of the so per cent. The Socialists among the labor men stand for ideals and that is, perhaps, the reason they cause all the excitement.

"We should look upon the presen being indicative of the trend of the conditions of the day. I fancy that the unrest in France will soon be the unrest here unless we can find some panacea that may allay, if not divert, the unrest from When we consider that for seventy-

five years the legislators of this nation had an opportunity to do away with slavery and that they did not, but that it had to be wiped out with the frightful horror of the civil war, we should strive to bend every sinew against the prevention of another such horror as that arising out of conditions that might be curedin time.

"A condition confronts us that calls for the attention of every business man.

"A condition confronts us that calls for the attention of every business man, every citizen, every human being."

Last night's dinner was the second of the recently formed Printers League of America, whose chief object, as put into practical operation by the New York firms having membership, is cooperation with the printing trades unions and the making of collective labor contracts between the association and the unions. The report of President Charles Francis, read last night, gave proof that the new idea has met with success. J. J. Little, who acted as toastmaster of the evening, spoke some plain words of advice to the unions when he adverted to the working of the new compact. He said:

ment depends upon the willingness of the parties interested. It will be necessary for the union leaders to be on the alert and to educate their members to study these conditions and even to make what a times may seem to be personal sacrifices "The object of the Printers' League is

not to secure the peace that comes to the fold when the lion and the lamb lie down together, but it is to secure justice and prosperity to all concerned. To this end I want to caution our friends who are ere representing the unions that limitahere representing the unions that limita-tion of output must not in future be known in establishments controlled by members of the league. ### MR. BRYAN NOW KNOWS WHY

THINKS OUT REASONS FOR DEFEAT BETWEEN DUCKS.

Democracy Divided by the Money Question-Now It's a United Educational Influence—Republicans Had Press and Salaries-Good Sport in Mexico.

ALDAMAS, State of Nueva Leon, Mexico, Nov. 24.-William J. Bryan and eight American residents of Monterey pitched their hunting camp near Aldamas last evening. Mr. Bryan, under the escort of a Mexican guide, made an excursion unrest among the classes in France as along the San Juan River duck shooting shortly after his arrival and had good success with his gun.

The warm weather, however, has caused the ducks to take flight further southward and they are not as plentiful as was expected. Mr. Bryan spent most of the day shooting ducks and hunting small game. He got a big bag of fowl. Deer are plentiful in this locality and he will make an effort to kill some of the bucks to-morrow.

Mr. Bryan was in telegraphic touch with the outside world to-day and received news of the publication of the list of campaign contributions of the Republicans. He will not be ready to make any comment, he said, until he has read the full list of names of those who con-

tributed to the fund.

He has arrived at a solution of the problem of how he was defeated. In speaking generally on the topic, he said:

"Our party has been at a disadvantage in several ways. In the first place it has been divided. The money question was the surface question when that division occurred, although the line of cleavage ran deeper then the money question. ran deeper than the money question That division is practically healed are the Democratic party is more united than has been the case since 1893.

"Then the Republican party has had the advantage of having most of the large newspapers on its side. In fact our party had very little support from the metropolitan press in the North.

"Third, the Republican party has had the large that the support from the metropolitan press in the North."

"Third, the Republican party has had the large that the large that the support from the large that the large that had been support from the large that the large that had been support from the large that the large that had been support from the large that had been support

ers, who exert powerful influence over their employees. It has a so had the ad-vantage of having the Administration, with an army of effice holders whose salaries come from the public treasury and who can therefore be active in poli-tics without interfering with their busi-

tics without interfering with their business.

"Added to this the Republican party being in power in nearly a!! the Northern States, the local offices, State, county and city, are nearly all culisted in behalf of the Republican party. In spite of these disadvantages the Democratic party has a large membership and exerts a big influence in moulding public opinion and it will continue to urge reforms that and it will continue to urge reforms that

"It has seen numbers of its policies taken up and indorsed by the Republican party and it will continue to be an educational influence until it becomes strong enough to secure control of the offices
